IGP Pulvertechnik AG

A coating concept using products from DOLD and its sister company IGP Pulvertechnik AG was implemented at the Wil site. The result is a uniform appearance across all surfaces – both inside and outside.

Facts

Area	Painters / Decorators
Location	9500 Wil
Endclient	IGP

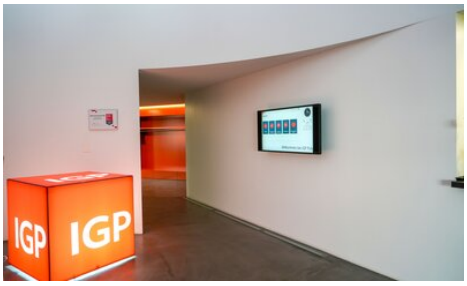

Project details

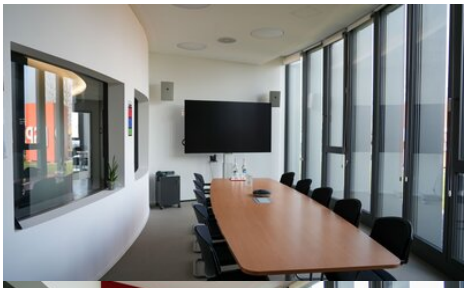

Only solutions from DOLD / IGP were used for the coating work at the Wil site. Where powder coatings were technically appropriate, components were coated with high-quality powder coatings from IGP Pulvertechnik AG. All surfaces that could not be powder coated were given a wet paint or wall coating from Dold AG.

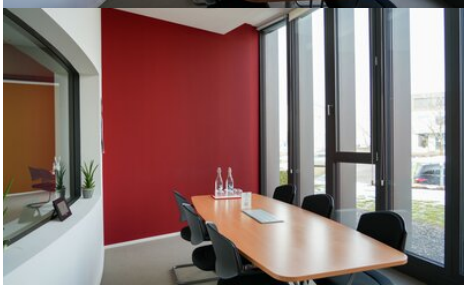

The unique system coating concept, which optimally coordinates wet and powder coatings, enables a consistent and harmonious appearance to be achieved. Facade elements, components, and interior walls – the latter coated with Living Art – fit seamlessly into the overall design concept.

The close cooperation between DOLD and IGP enables a broad, coordinated product range and offers the right coating solution for almost every surface.
