Grand Hotel Des Bains Kempinski

Elegance meets safety Historic architecture and modern fire safety need not be at odds with one another.

Facts

Area	Fire protection
Location	7500 St. Moritz
Year of construction	2026
Endclient	Grand Hotel Des Bains Kempinski

Project details

The striking steel columns in this impressive hall have been coated with HENSOTHERM® 410 KS. This intumescent steel fire protection system protects the load-bearing steel components in the event of a fire, whilst preserving the structure's elegant, slender appearance.

The result is a solution that combines the highest standards of aesthetics and safety. For fire protection that remains virtually invisible.
